

**SYLLABUS OF THE EDUCATIONAL COMPONENT
ORTHOPEDIC DENTISTRY (INCLUDING IMPLANTOLOGY)**

Specialty: **221 "Dentistry"**

Educational and professional program: **Dentistry**

Component code in the educational program: **GC 30**

Level of higher education: **second (master's)**

Form of education: **full-time (full-time)**

Year of study: **5**

Semester(s): **IX (Autumn), X (spring)**

Type of educational component: **mandatory**

Academic year: **2028-2029**

Amount: **6.5 ECTS credits (195 hours)**

Training sessions: **practical classes, independent work, consultations**

Final control: **differential credit**

Prerequisites: **GC 4; GC 6; GC 7; GC 8; GC 12; GC 13; GC 14; GC 18; GC 19; GC 20; GC 21; GC 22; GC 23; GC 25; GC 27**

Department/Unit: **Department of Prosthetic Dentistry**, Peremohy Ave., 51, UDC KhNMU, 4th floor

Head of the educational component: Doctor of Medical Sciences, **Professor Yanishen Igor**

Volodymyrovych,

email: iv.yanishen@knmu.edu.ua

Page of the educational component in the Distance Learning System of KhNMU

(Moodle): <http://distance.knmu.edu.ua/course>

DESCRIPTION OF THE EDUCATIONAL COMPONENT

Orthopedic dentistry is an educational component aimed at developing knowledge and practical skills in diagnosing, planning, and performing orthopedic treatment for defects in hard dental tissues, partial and complete tooth loss using modern designs of fixed and removable dentures.

PURPOSE OF THE COURSE: professional formation of a future specialist capable of solving clinical problems using acquired knowledge and skills in the discipline, which involves the integration of teaching the educational component with therapeutic, surgical and pediatric dentistry.

LEARNING OUTCOMES:

- Explain the anatomical, physiological and biomechanical foundations of the functioning of the dento-maxillary apparatus that are important for orthopedic treatment.
- Diagnose defects in hard dental tissues, partial and complete tooth loss, determine the types of occlusion disorders and plan methods for their orthopedic correction.
- Choose the optimal type of orthopedic structure (fixed, removable, combined, on implants) according to the clinical situation.
- To master the methods of clinical and laboratory stages of manufacturing orthopedic structures, to control the quality of the prostheses and the accuracy of their fixation.
- Apply modern materials, digital technologies and CAD/CAM systems in the process of making dentures.
- Evaluate the functional, aesthetic, and biocompatible characteristics of prostheses, determine the causes of possible complications and ways to eliminate them.

CONTENT OF THE EDUCATIONAL COMPONENT

List of lectures topics (16 hours):

1. Orthopedic treatment with fixed dentures. Main types of implant-supported prosthetics.
2. Orthopedic treatment with removable dentures.
3. Orthopedic treatment methods for injuries of the maxillofacial region.
4. Periodontitis and periodontal disease. Clinic. Classifications. Methods of research and diagnosis. Orthopedic treatment methods in the complex therapy of periodontal diseases.

5. Increased abrasion of hard dental tissues. Etiology. Pathogenesis. Clinic. Diagnostics. Methods of orthopedic treatment. Prevention. Prognosis.
6. Etiology and pathogenesis of dentofacial deformities. Diagnosis. Clinical forms, classifications. Treatment of dentofacial deformities.
7. Diseases of the temporomandibular joint. Etiology, clinical features, diagnostics. Methods of orthopedic treatment.
8. Legal aspects in the professional activities of an orthopedic dentist.

List of topics of practical lessons (124hours):

1. Modern methods of examining dental patients.
2. Orthopedic treatment of dental crown defects with veneers.
3. Tooth restoration after endodontic treatment.
4. Gum retraction. Impression taking techniques. Final lesson.
5. Etiology and pathogenesis of dentofacial deformities.
6. Alignment of the occlusal surface as a preparatory stage for prosthetics.
7. Excessive abrasion of hard dental tissues. Final lesson.
8. Focal and generalized periodontitis.
9. Periodontal disease. Etiology. Pathogenesis. Clinic. Final lesson
10. Etiology. Pathogenesis. Clinic and diagnostics of TMJ diseases.
11. Neuromuscular and occlusal-articular dysfunction syndromes of the temporomandibular joint.
12. Protection of medical history.
13. Differentiated credit.
14. Replacement of defects in hard dental tissues with inlays.
15. Aesthetic crowns: plastic, composite, metal-ceramic, metal-free. Indications and contraindications.
16. Clinical and laboratory stages manufacturing of aesthetic crowns.
17. Replacement partial defects of the dentition Bridge prostheses. Indications and contraindications.
18. Clinical and laboratory stages of manufacturing bridge prostheses. Final lesson.
19. Replacement of dentition defects with partial removable dentures. Clinical and laboratory stages of manufacturing.
20. Indications and contraindications for replacing partial dentition defects with clasp dentures.
21. Orthopedic treatment of edentulous jaws. Final lesson.
22. Orthopedic interventions in the complex treatment of periodontal diseases.
23. Increased abrasion of hard dental tissues.
24. Dental and jaw deformities. forms.
25. Temporomandibular joint disease.
26. Allergic conditions in orthopedic dentistry.
27. Practicing practical skills. Final lesson.
28. Differentiated credit.

List of topics of independent work of the student (55 hours)

1. Algorithms of medical actions at an orthopedic appointment.
2. Possibilities of aesthetic restorations. Technique of execution.
3. Features of orthopedic treatment with pin structures.
4. Principles of eliminating dento-alveolar deformations with changes in interalveolar height in the case of partial absence of teeth.
5. Clinical complications are caused by excessive abrasion of hard dental tissues.
6. The influence of the patient's periodontal status on the choice of orthopedic treatment method.
7. Morphological, physiological and functional properties of the TMJ.
8. Microprosthetics capabilities, manufacturing tools.
9. Features of designing bridge prostheses for dentition defects.

10. Comparative characteristics of removable and non-removable structures.
11. Possibilities and advantages of a clasp prosthesis.
12. Features of the treatment of edentulous jaws and ways to solve them.
13. Orthopedic methods of stabilizing dentition in cases of periodontal disease.
14. The relevance of eliminating dento-alveolar deformations in the comprehensive treatment of patients.
15. Description of diagnostic features for the treatment of TMJ.
16. Temporomandibular joint disease.

The IWS is aimed at deepening and consolidating the theoretical knowledge gained during classroom training and contributing to the formation of professional competencies. The results of the IWS are subject to control and are included in the final control of knowledge.

Consultations: online, according to the schedule of the educational department.

Teaching methods: narrative-explanation, conversation, illustration, demonstration, presentation, videos, video films, discussion, modeling of processes and situations, case method, project method, debate, "Brainstorming" method.

EVALUATION

Current Learning Activities (CLA)- is the educational activity of a student during the semester, which is controlled by a scientific and pedagogical worker conducting classes in a group. CLA is considered completed if the student has completed all missed classroom lessons and lectures in the current semester, and the average score for all PC topics is 3 points or higher, in which case the report is marked "completed" and the average score in a 4-point system is indicated (calculated automatically within the functionality of the ASM electronic journal), or "not completed", if the student has missed classroom lessons and lectures in the current semester, or the average score is below 3 points.

Independent work of the student (IW) The educational material of the discipline, intended for the student to master in the process of independent work, is submitted for final control together with the educational material studied during classroom training sessions.

General Educational Activities (GEA)- is considered completed if student has completed all missed classroom lessons and lectures, and the average score for all PC topics is 3 points or higher. Points for the GEA for disciplines with the form of control "differentiated credit" are calculated as the arithmetic average of PC points for all topics of all semesters, throughout the entire period of studying the discipline (with an accuracy of one hundredth) according to Table 1 "Recalculation of the average score for current control into a multi-point scale, automatically within the functionality of the electronic journal of the ASM. GEA is determined in points from 70 to 120. GEA is determined in points from 120 to 200, in accordance with the "Instructions for assessing the educational activities of higher education applicants at KhNMU".

Individual tasks (IT) contribute to a more in-depth study of theoretical material by the student, the formation of skills in using knowledge to solve relevant practical tasks. IT is performed by the student independently, receiving the necessary consultations from a scientific and pedagogical worker.

- report student's essay on a practical lesson 0-2 points;
- presentation report in the practical lesson 0-3 points,
- report at scientific and practical conferences, writing abstracts, articles 0-5 points;
- participation in the All-Ukrainian Olympiad – 5-10 points

IT are evaluated in points (no more than 10), which are added to the points scored for the LND upon completion of the discipline, during the "credit test."

The total score for GEA and IT cannot exceed 200 points.

Final control. Admission to the DC is calculated in terms of GEA scores from 70 to 120 points. The DC itself is evaluated from 50 to 80 points.

Grade in subject (GS). The grade for the discipline is the sum of the points for the CLA, IT and DC and ranges from 120 to 200 points.

Appealing the results of the final control is carried out in accordance with the procedure established in KhNMU (https://knmu.edu.ua/wp-content/uploads/2021/05/polog_apel_kontrol.pdf).

EDUCATION COMPONENT POLICIES

Recommendations for working on the course: To successfully complete the relevant course, you must regularly attend practical classes; have theoretical preparation for practical classes according to the topic; not be late or miss classes; complete all necessary tasks and work in each class; be able to work with a partner or as part of a group; contact the course supervisors for help on various issues related to the subject of the classes and receive it when you need it. The participation of education seekers in conducting scientific research and conferences on this topic is encouraged.

Attending classes. Attendance at lectures and practical classes is mandatory. The uniform for offline classes is a white medical gown. If you are more than 5 minutes late, you may not be allowed to attend the class. Missed classes are made up in accordance with the Regulations on the procedure for students of KhNMU to complete classes (https://knmu.edu.ua/wp-content/uploads/2021/05/polog_vidprac_zaniat.pdf).

Academic integrity. KhNMU stands on the positions of zero tolerance to manifestations of academic dishonesty. Any violations of the principles of academic integrity entail responsibility in accordance with the procedure established by KhNMU (https://knmu.edu.ua/wp-content/uploads/2021/05/polog_ad-1.pdf).

Use of electronic gadgets and artificial intelligence tools. Copying, using various kinds of software, hints, using a mobile phone, tablet, or other electronic gadgets during class for purposes unrelated to the educational process are not allowed.

Policy on individuals with special educational needs. Applicants with special educational needs should contact a teacher to develop an individual educational trajectory.

Teacher response time: 24 hours.

Technical requirements for the course:

- access to a computer, laptop, tablet or smartphone
- corporate Google account with your own photo
- skills in working with Google Workspace (Google Meet, Docs, Sheets, Slides, Forms) and Moodle

Technical support: ASM (ev.shevtsov@knmu.edu.ua), Google (tehotdelknmu@gmail.com), Moodle (al.korol@knmu.edu.ua)
